Our aluminum bronze valve guide's excellent wear properties have been proven over and over again in grueling racing applications.

PPPC Guides are a head porters #1 choice when replacing guides or changing the valve location, because the concentricity is much more accurate & the material is superior to manganese bronze.

They feature a .530" grooved seal diameter with a 9/16" spring seat locator. They're available in lengths from 2.000" to 2.600" and diameters of .502" to .625".

Remember, we will quote custom specifications on almost any product we manufacture.
