

## Laser Marking Services

Eric Gilbert, Laser Technician and Programmer oversees quality control on every order.

### Laser ID for private label customers

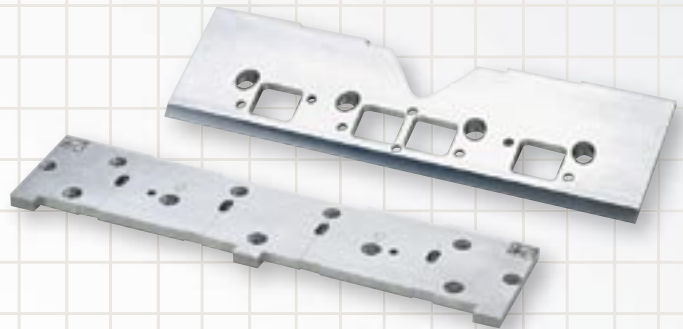

StarMark by BAASEL Laser Tech is our latest addition of services available to all of our customers. The StarMark Diode is a marker beam source with diode pumped YAG (DPY) lasers—particularly suitable for permanent marking of plastics, metals, and high-tech materials. Ideal for intergration in production.

Many of our customers are benefiting from this new in-house technology—particularly for private labeling logos, but also for serial identification and patents.

Any quantity you require can be accomplished. We'll be glad to include this service in your custom or shelf-stock order. The possibilities are endless.

## PPPC NASCAR Head Templates & Gauges

## PPPC Degree Wheels

16" Degree wheel is machined from 1/4" Aluminum. Degree marks are machined approximately 1/8" apart so they're easy to read. Heavy design allows the builder to rotate the engine while "degreeing" the cam. Comes with 7/16", 1/2" and 5/8" bushings.
