

Wrist Pin Wire Lock Installer

One of our favorite customers invented this handy tool for ease of lock installation. They are available in steel or a disposable plastic version for your tool box at the track.

Ultimate replacement

We have found that many problems with the wrist pin start with the rod bushing. Our bushings are made from the best bronze alloys available. Whether you are replacing rod bushings or changing your pin location, we have the bushing you need. Custom sizes are available.

Recommended press: .003" to .005"
